RUFF-WEIGH 200 HYDRAULIC WEIGHING SYSTEM For Industrial Loaders

The Ruff-Weigh 200 is a Weigh-In-Motion Hydraulic Weighing System for Industrial Loaders. The Ruff-Weigh 200 Weighing System comes standard with our color touch screen display allowing the operator to view the Current Lift, Material Type, Accumulated Weight and Customer Name. The Ruff-Weigh 200 Weighing System also allows the operator to Zero the Scale and to utilize the Tip-Off Feature. The Ruff-Weigh 200 allows the operator to weigh the bucket load while the loader is in motion. This system is 99% accurate (Typical). With the Ruff-Weigh 200 Weighing System a Radio Frequency Link is available for two-way communication between the operator and the manager on duty. This allows the manager to advise the operator of a special order or process needing to be accomplished.

The Ruff-Weigh 200 comes with everything needed for installation. Furthermore, the system can be installed in approximately 4-5 hours and requires **NO PROXIMITY SWITCHES AND NO WELDING!**

Features and Specifications:

- 99% Accurate (Typical)
- Precision Sensor - 6,000 psi
- Tons / Lbs Conversion
- Storage of up to 10 Material Types
- Storage of up to 20 Customer Names
- Operates from 10-40VDC
- Digital Calibration
- Remote Total Switch: Choose Foot or Hand Control
- RS232 Port for Printer/Data Output
- Color LCD Display - Touch Screen
- 12-Month Warranty against defects in material and workmanship

Complete installation kit included.

Choose from foot or hand control remote total switch.
